EFFICIENCY WITHIN EASY REACH

The new **d-Color MF223 and d-Color MF283 Multifunctional Systems** are perfect for anyone looking for **quality technology** at an **affordable price**.

Reliable and **simple to use**, they satisfy the **demands of the modern office** with **excellent paper capacity** (up to **3,600 sheets** with optional trays) and **modular flexibility** for the most demanding of needs. An **individual authentication process** allows access to up to **1,000 users** with **web surfing and printing** made easy via the practical **7" touch panel**. **Airprint® and NFC** (Near Field Communication) are standard functions and allow **mobile devices to connect directly to all functionalities** with user authentication and printing.

A special software connector (optional) allows connection to **Google Cloud Print™ directly from the touch panel**. Finally, the **low energy consumption levels** allow **real cost savings** with **full eco-compatibility** through the use of **recycled and recyclable materials**

The d-Color MF283 equipped with a DF-628 Document Feeder, FS-534SD Finisher and PC-214 Trays

FUNCTIONAL AND ROBUST

The new **d-Color MF223** and **d-Color MF283** are **sophisticated** yet **simple-to-use** products. They are particularly suitable for **cost-conscious businesses** and **integrate seamlessly within** modern offices with their high levels of **reliability** and the **compatibility with the latest** technology.

ALWAYS CONNECTED

For convenient direct access, these new Multifunctional Systems are equipped with a **7" touch panel** featuring an **intuitive user interface** similar to that of a PC, tablet or smartphone.

This interface coupled with the standard **web browser** allows **surfing and printing directly from the internet** on either model. Printing is also supported by **Android devices using NFC** (Near Field Communication) **technology** and **iOS devices communicating via Bluetooth® LE** (optional). **Other types of connection can also be used for printing from devices: Airprint® is provided as standard** on both new models, while **Google Cloud Print™** compatibility requires the installation of a **special software connector**.

PRACTICAL AND RELIABLE

The **d-Color MF223** and **d-Color MF283** are designed to handle intense workloads. The **standard paper capacity of 1,100 sheets** is divided between a **500-sheet A4 tray**, a **500-sheet maximum capacity A3 format tray** and a **100-sheet by-pass tray for formats from A6 to A3 size**. With the **optional PC-414 2,500-sheet tray**, the paper capacity can be increased to a **maximum of 3,600 sheets**.

For even greater productivity a **DF-628 originals feeder** can be added to the **d-Color MF223** and **d-Color MF283**, for **duplex scanning**. As an alternative to the **3,000-sheet FS-534 lateral finisher**, an **FS-533 500-sheet finisher** can be integrated within these models, with connection provided by the **new RU-514 option**.

Moreover, the **FS-534SD finisher** allows **booklets of up to a maximum of 20 sheets to be produced** with centre stapling. To complete the finishing options, a **perforator option** is available for all finishers.

INSTRUMENTS TO SHARE

In an ideal working environment it should be possible to share all instruments available in the office. The **d-Color MF223** and **d-Color MF283** provide access to up to 1,000 users.

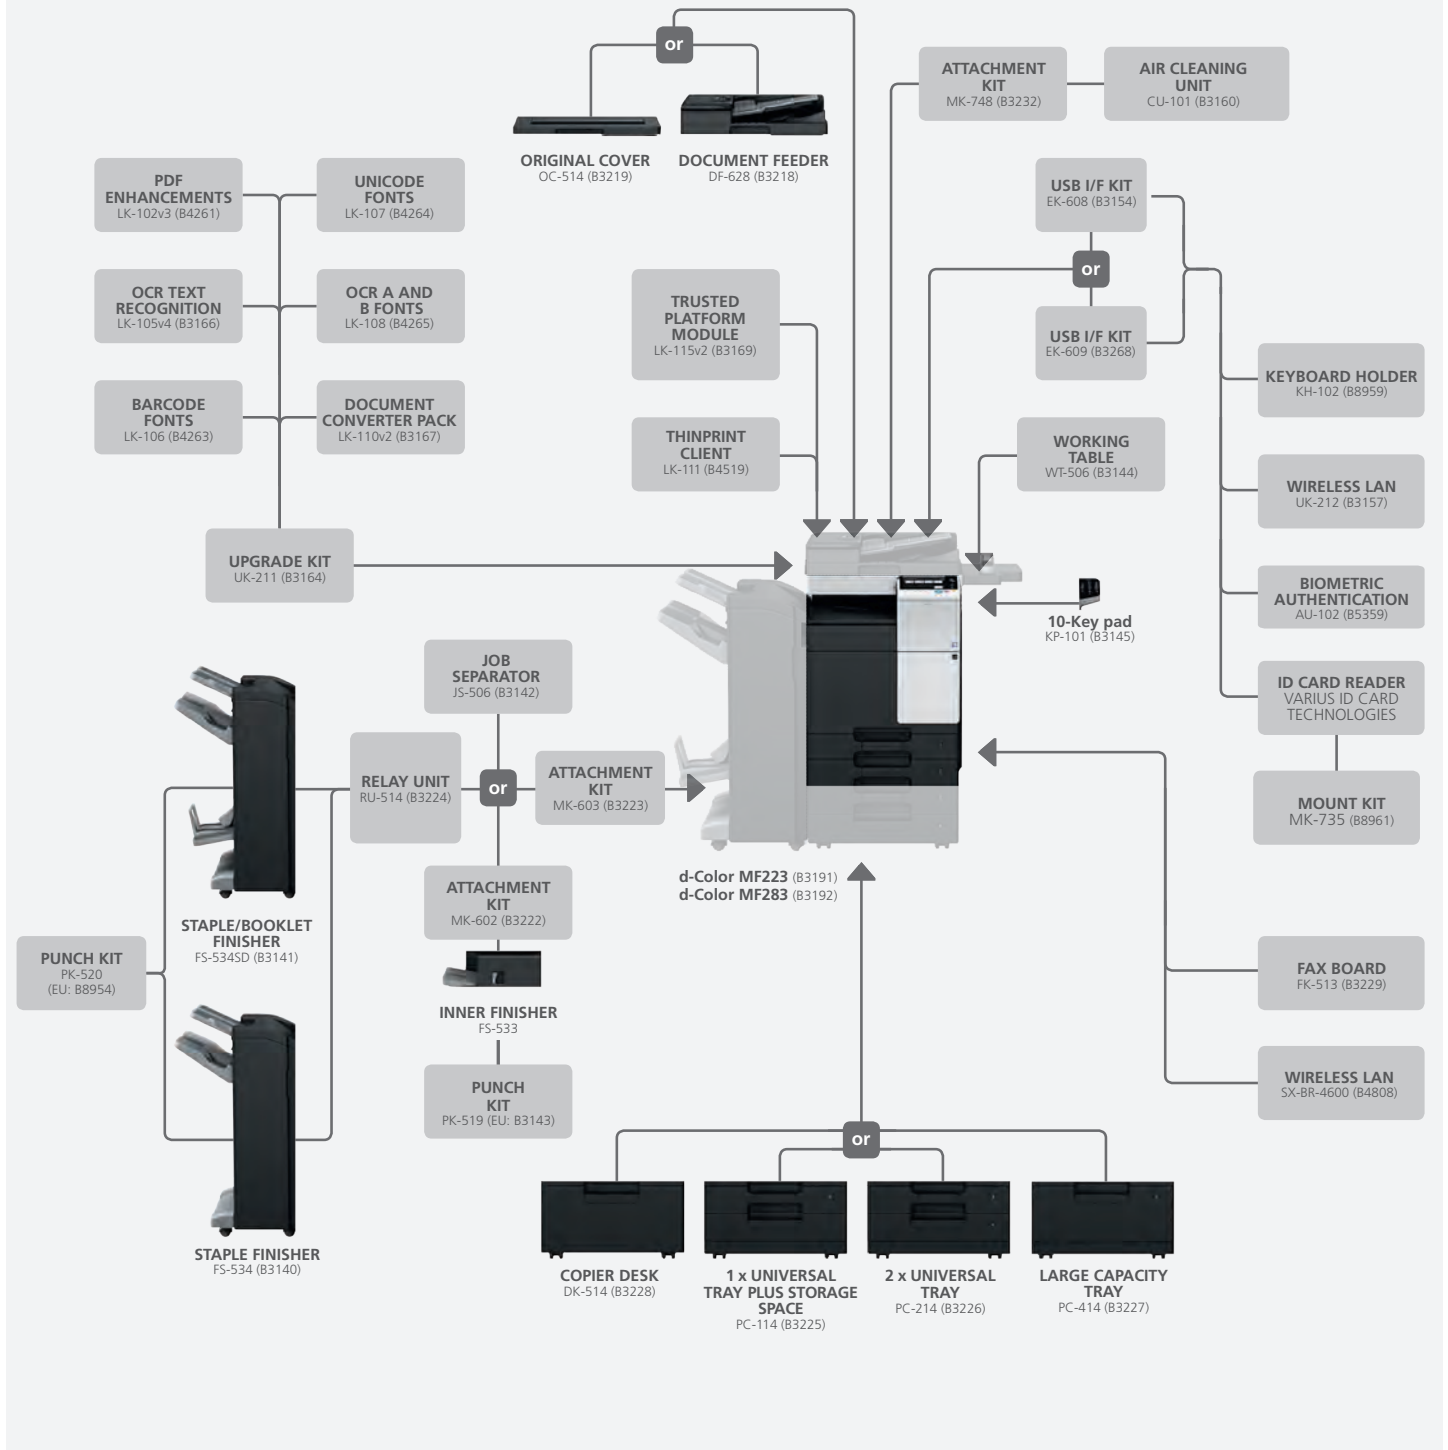

Each user has their own **personal profile** set up by the system administrator determining the functions they can use. **Individual authentication** is possible via the **Touch Panel** using one of the card readers available or the **AU-102 Biometric Reader** (Finger Vein Mapping Recognition).

These new models are also compatible with network authentication based on **Active Directory**.

LOW ENVIRONMENTAL IMPACT

Genuine savings are possible through demonstrating true respect for the environment. In fact, the new **d-Color MF223** and **d-Color MF283** have **reduced energy consumption levels** in both Sleep Mode and Operating Mode, resulting in one of the lowest TEC (Typical Electricity Consumption) parameter values, and are made of recycled and recyclable materials.
